BETTER EARLIER - WHAT REALLY MATTERS WHEN SELECTING EU PROJECTS?

ŁUKASZ KONOPIELKO, PhD (UCL), currently assistant professor at Lazarski University, Warsaw. Active assessor in various EU financed grant schemes.

Lecture will analyse applicable methods of EU funds efficiency and operational performance assessment with a special attention to quantitative approach on non-macro scale. The 2021-2027 EU financial perspective puts a stress on innovation support and this may limit absorption of EU funds due to the low innovation potential of companies and other absorption problems. Thus, we will look on particular empirical features of previous implementations to seek practical solutions for the current round of spendings.

SEPTEMBER 23, 2024
