# Internship report

**Time period:** 01.04.2024 – 30.04.2024

**Place:** University of Primorska, Koper, Slovenia

## Description of activities:

From 1<sup>st</sup> to 30<sup>th</sup> of April 2024, I took part in the internship at the University of Primorska in Koper, Slovenia. I was supervised by prof. Jana Hojnik from Department of Management at the Faculty of Management.

Prof. Hojnik is one of the most prominent researchers in the fields of sustainability and innovations. I read and cited many of her articles, including those, which prof. Hojnik wrote in cooperation with my supervisor, prof. Viktor Prokop.

I was actively working on my PhD thesis and next publication, consulting with prof. Hojnik. I was preparing the final version of the article for the 19th European Conference on Innovation and Entrepreneurship (ECIE), which will take place on 26-27 September 2024 in Paris, France. We worked on this paper together with our colleague Ing. Ondřej Kuba, Ph.D. I submitted a final version of the paper called "Governmental policies and sustainable outcomes in EU: How innovations change the game?", and it was accepted by the conference committee.

Apart from that, I was working on my next journal publication according to SGS plan. This article will be considering the topic of sustainable innovation implementation in EU countries, and will be connected with the topic of my PhD thesis.

I attended a seminar "Principles of entrepreneurship", taught by prof. Hojnik, and a course of Slovenian language at the University of Primorska. It was useful for me to find out about specifics of entrepreneurship in Slovenia, and challenges regarding sustainability, which businesses face there.

I also had a chance to meet other researchers and professors at the University of Primorska, including a colleague of prof. Hojnik, prof. Ruzzier. With prof. Ruzzier we discussed research related opportunities and topics, including those I am currently working on. Besides this, I took part in some events organized by student organizations in Koper, where I had a chance to meet other students,

Prof. Hojnik offered a possibility to publish a scientific paper together. We discussed the possibilities of our cooperation in the future. I am grateful to my supervisor, prof. Viktor Prokop, and to prof. Jana Hojnik for providing me with such a great opportunity! The internship helped me to understand how to improve my dissertation topic, and how to proceed with my current research activities, including the ways to describe theoretical concepts. The internship at the University of Primorska helped me in professional and personal development. I enriched my knowledge on economic theory thanks to a course I attended. And I had a chance to work in the intercultural environment and to learn about different ways of doing research.

Denys Dmytrenko
