### „DOING RESEARCH ON STAKEHOLDER ENGAGEMENT“

Annotation: „The topic of stakeholder engagement in decision-making has been extremely popular over the last decades, not only in academia but also among policy-makers. Turning the ideal principles of stakeholder engagement into practice is troublesome, though, and the track record of participatory decision-making is far from satisfactory. What it takes to make stakeholder engagement „work“? Prof. Brusati is going to present his studies that try to tackle this question.“
